

KOREA BEAUTY CLINIC

Beautiful skin begins here

Start your skin journey with **Observ 520** skin analysis

Observ 520 is an advanced skin analysis system uses Advanced Imaging System that analyses skin conditions in all aspects, allows you and dermal therapist to see deep into the skin in detail.

6 Modes of Operation

	 Daylight		 Woods Lamp
	 Parallel Polarised		 True UV
	 Cross Polarised		 Complexion Analysis

The 6 different light sources/filters of the OBSERV provide vital information about the overall health of client's skin, including potential desquamation issues, microbiome health, vascular and pigmented abnormalities, and more. You can also "look forward" to predict future potential issues.

Daylight / "Clinical Evaluation"
The skin as seen in an controlled natural daylight environment.

Parallel Polarized / "Show the surface texture"
An enhanced view of the skin's surface; fine lines, microrelief, wrinkles, texture and pores.

Cross Polarized / "Look into the skin"
With the skin's surface shine suppressed, obtain an unobstructed view of dermal structures, vascular conditions, inflammations , pigmentations.

Woods Lamp (Simulated) / "A modernized classic"
The light dermatologists and skin therapist are familiar with. By adjusting the spectrum the distribution of skin secretions is revealed in colour.

True UV / "Fluorescence skin analysis"
Skin abnormalities on the skin's surface or in deeper skin layers's create distinguishable fluorescence patterns and stand out from surrounding healthy skin.

Complexion analysis / "Irregularities revealed"
The complexion analysis reveals transformations in skin tone, pigmentation irregularities and vascular irritations. A homegenous complexion is the fundament of beauty.

SKIN TREATMENT FACIAL

Facial treatments at Korea Beauty Clinic offer for everyone, and every skin type. We offers a wide range of facial treatments to address issues such as hydration, dullness, ageing and sensitivity.
